Cloud Security Workshop

What is it about?

The **Cloud Security Workshop** provides you with the base knowledge to create and manage a secure AWS cloud environment. We can provide different and adapted solutions based on your requirements regarding compliance regulations, existing tool suites and other preferences. The workshop enables you to manage and follow security best practices based on predefined templates and compliance standards.

Why do i need this?

- I don't have any **security concept for the cloud** in place.
- I must manage multiple accounts, which is **error-prone** and **inconsistent**
- I don't know which **security solutions** fit my needs best
- I neither have the **knowledge nor the time** to work out a security concept for my company.
- I don't use **Infrastructure as Code** (IaC) account-wide to manage the security related services.
- I **have concerns** enforcing a hard security governance
- I don't have a **single pane of glass** to manage my security requirements

What do i get?

- **Cloud security workshop** to evaluate your security and compliance needs.
- **Knowledge transfer** to operate, extend and improve the obtained security concept.
- **Security blueprint document** that fits your compliance requirements best.
- **Sample implementation** of base security solution (AWS CloudTrail, AWS Config, etc).
- Increase of **business security** by using a security concept.
- **Base security recommendations** to integrate into your core functionality such as auditing, provisioning and centralized billing.

Solution Design and Overview:

With a customized workshop we can evaluate your business and compliance needs and create a security concept which fits your needs. We will work out the best tools for your solution.

At what price and what is the value?

This package contains the following items to provide significant added value:

- Cloud Security Workshop to evaluate your security and compliance needs.
- Consulting and design of basic security concept
- Sample Implementation of base security solution
- Knowledge transfer to operate, extend and improve the security concept.
